Projects

- QuotivationBoard

Front End: Mobile-first, single-page web application that allows users to select from a list of influential people and, in an aesthetic display, receive a different quote from each of them every 24 hours

Back End: REST API that manages quote data for 10,000+ different authors, user data, and user authentication

- 1001 Movies Checklist

Front End: Mobile-first, single-page web application that allows users to view information about and check off movies listed in the popular book *1,001 Movies You Must See Before You Die*

Back End: REST API that manages movie data from the 1,001 movies, user data, and user authentication

- **NextEpCountdown** - Mobile-first, single-page web application that displays a countdown for the next unaired episode of a user selected television show (TVMaze API)

- **ViralShorts** - Mobile-first, single-page web application that, based on a user's search, returns and plays a list of videos that are less than 4 minutes long, sorted in order of view count (Youtube API)

- **HabitBuilder** - Mobile-first web application that allows users to track the daily completion of their desired habits
